Opt in on Ubuntu Linux

Staff members and postgraduate students using IDS-managed Ubuntu endpoints can opt-in to the Enterprise Print Pilot to trial the new PaperCut-based printing solution implemented by Ricoh.

Please note: Student Lab computers running Ubuntu Linux are not covered by this pilot and will continue to print to the UniCard print system.

Opt in on Ubunti Linux

Install print driver
1. Open a Terminal on an account that has the privileges to use the 'sudo' command. The terminal must by on the campus network.
2. Run the following command in the terminal: curl -s http://ubntutil.flinders.edu.au/autoinstall/scripts/printpilot.sh | sudo sh
3. The printer will be installed automatically and when printing will prompt for user credentials (FAN and password)
